 ON ONE CLASS OF NON-LINEAR DIFFERENTIAL EQUATIONS. [1960] 19p. 3 refs.
 Order from LC or SLA ml\$1.80, ph\$1.80 61-10681

1. Non-linear differential equations
- I. Bakel'man, I. Ya.

Trans. of Akademiya Nauk SSSR. Doklady, 1959, v. 126, no. 2, p. 244-247.

Investigations are made of the Euclidian space Q of vectors $q = (q_1, \dots, q_n, q_1, \dots, q_n, q)$ and of the function $F(q, x)$ when $q \in Q, x \in D$. Here D is the closed bounded region of the n -dimensional Euclidian space $x = (x_1, x_2, \dots, x_n)$. The boundary of D of the closed surface Γ is described in the neighborhood of each of its points x by equations $y_n = f(y_1, y_2, \dots, y_{n-1})$, where f is the twice continuously differentiable function of all its arguments. Axes y_1, y_2, \dots, y_{n-1} lie in the plane that is tangent to Γ at point X , and axis y_n is directed on the normal to Γ at point X . Three theorems are presented.
